

VerdiSeal™

Waterproofing Systems
for plaza decks and roofs

Dow Hyperlast

VERDISEAL™ is developed and manufactured by Dow Hyperlast, a leading polyurethane system house within Dow Polyurethanes, a global business of The Dow Chemical Company.

Dow Hyperlast applies its 30 years' experience to the continued development of innovative materials, products and solutions for the benefit of customers worldwide. This commitment to the industry and to customers is demonstrated by ongoing investment in research and manufacturing facilities.

VERDISEAL™ is an elastomeric system that combines seamless, monolithic waterproofing with fast installation that will accommodate complex roof designs, roof penetrations and difficult detailing.

VERDISEAL™ offers designers a choice of locally sourced overburdens, from roof gardens to pavers or concrete, without limitations. All of this is backed by Dow Hyperlast's extended warranty program.

Verdiseal characteristics include:

- 30 year manufacturer's labor and materials, warranty available.
- It can be walked on and overlaid after 4 hrs @ 68°F.
- Once fully cured, it can be driven on by landscaping vehicles.
- VERDISEAL can be laid to a zero pitch and constantly submerged in water.
- It has NO noxious odors and is formulated without solvents
- NO protection board is required
- NO root barrier protection is required.
- NO reinforcing sheets, surface flashings or termination bars are required.
- VERDISEAL can be applied in sections, over time, with NO seams.
- NO hot kettles or naked flame are used.

This unique package of technical characteristics mean that the use of VERDISEAL can contribute to a project obtaining U.S. Green Building Council, LEED certification (Leadership in Energy and Environmental Design), by achieving Green Building Rating System credits.
